Flexible Solutions For Today's Filing Problems.

## The Most Versatile, Easy-To-Use Filing System Available Today!

The Oblique Filing System has been designed around a single idea...ease of use! Its vertical suspended design saves floor space by as much as 75% over traditional file cabinets.

Oblique's Color-Keyed Indexing makes file retrieval fast and easy. By using color, along with your own coding system,
Oblique conforms to your requirements without compromise.

Expandable compartments can accommodate all your information requirements in one integrated flexible system. Also, support assemblies fit virtually any type of shelving including mobile, static, cantilever, four-post, or anything else. Whatever your needs, we have a system to suit you.

Oblique's European-made, hand-finished compartments provide the ultimate in quality and durability. Features include magnified indexes, linked design and triple-fold riveted construction.

From file folders to printouts to forms to contract files, Oblique has a system to satisfy your precise filing needs. Take a look at Oblique. Whether you need a small system for your departmental files, or a large system to house thousands of documents, Oblique has the solution for you.

### The Oblique Shelf

The Oblique Shelf has been designed as an alternative to ordinary shelving systems. The Shelf holds both top-tabbed and sidetabbed file folders in letter or legal sizes.

Due to its original design, the Shelf provides the user with the same capacity as ordinary shelves but includes Tri-Optic indexing, more dividers per row, and more accessibility. This makes it perfect to use for conversions from drawers and lateral file cabinets. The Oblique Shelf can also be integrated effectively with color coded file folders. As a bonus, Oblique's lightweight design makes the Shelf ideal for mobile shelving installations.

#### Color-Keyed Indexing™

The key to an efficient filing system is indexing. Oblique recently introduced Color-Keyed™ indexing which can be adapted to suit your particular needs—whatever they are!

Guides are used in the upper position to provide major category breakdowns. The lower position provides a second or sub-category indexing level. Finally, individual index labels get you to a particular compartment immediately.

Color accenting and laser printed labels enhance the system and show you exactly what each compartment contains. Labels can be set up alphabetically, numerically, by subject, or any coding system you choose.

Color-Keyed Indexing makes retrieving files fast and easy.

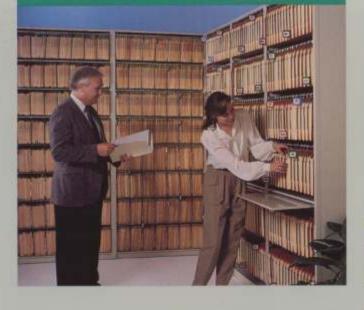

Easy to read laser-printed labels speed file identification.

Side stops allow for easy file expansion and growth within the system.
