## SafeStor

Oblique Safestor organizes and protects oversized drawings & blueprints

Oblique's Safestor is the only way to store blueprints, drawings, and oversized artwork in a safe and space efficient manner:

- ▶ By organizing oversized materials in a vertical storage system, you can increase your storage capacity by almost 400% over flat files.
- ▶ Because materials are not "piled" in a drawer, every drawing is at your fingertips.
- ▶ When used in conjunction with Oblique hanging compartments, E-Z View™ six inch label holders provide easy visual identification of your materials from across the room. Filing and retrieving is fast and easy.
- ▶ Eliminate unidentified maps and drawings rolled up all over your office, or worse, the floor.
- ▶ No more damaged or torn artwork as every piece is protected by Safestor's velcro-closure portfolio design.
- ▶ Notched handles allow for easy transport of materials around the office, or around town!

Ask about Oblique's complete line of graphic arts accessories including art envelopes, job jackets, and complete storage solutions for sizes from 8 1/2" x 11" up to 30" x 41". No matter what you're storing, Oblique has a system to suit your needs.
